Fructevia™

All Natural Sugar Substitute

The World's First and Only Good-for-You Sweetener.

At last a stevia sweetener with absolutely no aftertaste!

All the Sweetness You Want. None of the Chemicals You Don't.

A Sweet Success in Sugar Free, Low Carb and Low Glycemic Cooking and Baking

As public distrust of synthetic, chemical sweeteners grows, so does the demand for safe, natural alternatives. Smart manufacturers are responding by switching out their traditional ingredients for healthier ones without sacrificing flavor.

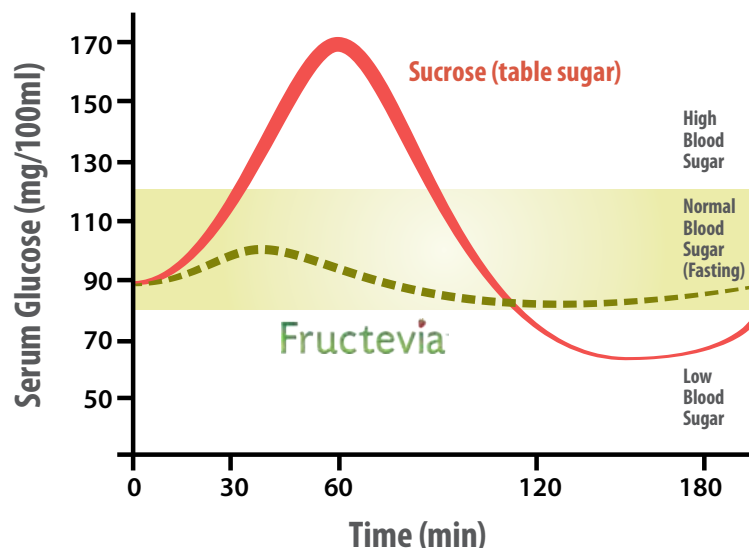

That's where Fructevia™ can help. Made with a patented blend of natural fructose, FOS, stevia & magnesium carbonate, it tastes exactly like sugar — guaranteed! — and has more than twice the sweetening power, so you only need to use half as much.

Fructevia The Natural Choice of food designer and processors

- Cost effective - twice as sweet as sugar - use half as much
- 100% clean and natural, chemical free - targets the natural/organic trend
- Participates in the Maillard reaction - naturally browns and caramelizes
- Reliable consistency, availability, quality and compliance with specifications
- Superior quality control standards with validated critical processes are to ensure consistency
- Choice of food designers targeting reduced sugar recipes
- Certified Kosher , Non GMO and Gluten Free
- Allergen free
- US FDA GRAS (Generally Regarded as Safe) status
- 100% food safety compliant

Low Glycemic Diabetic Safe. Fructevia uses all natural non-GMO, gluten free crystalline fructose. Crystalline fructose is digested in the liver and does not affect blood sugar levels. Our special blend of steviol glycosides (95% steviosides and 60% Rebaudioside A) increase the sweet concentration to 2.8 times sweeter than table sugar. Fructevia caramelizes and browns making it the perfect addition to your low glycemic food production.

Why Choose Fructevia™ Blend Sweetener

GMO Free, Corn Free Crystalline Fructose

Not to be confused with high fructose corn syrup, which can contain less than 10% fructose, ours comes from the cleanest, non-GMO fructose source in the world. Its glycemic index rating is a mere 20 — about 1/3 that of sucrose (table sugar) which is 59. And when you consider that you'll only need half as much Fructevia™ as sugar in your recipes, its insulin impact is practically nil.

FOS (Fructooligosaccharides)

A soluble fiber, sometimes referred to as Inulin and found in certain fruits and vegetables, it provides digestive benefits such as calcium absorption and support of friendly flora in the intestinal tract. It also contributes to Fructevia's sweetness, being about half as sweet as sugar with minimal caloric value.

Stevia Extract

Stevia is an ancient South American herb whose sweet constituents can be 200 to 300 times sweeter than sugar, but with zero calories or carbs to raise blood sugar levels. Our pure water extraction method also makes it free residual petro-chemicals.

Magnesium Carbonate

While this mineral from ancient sea deposits is included in Fructevia primarily as an anti-caking agent, it is also very beneficial for the normal functioning of cells, nerves, muscles, bones and heart by aiding the absorption of calcium.

Our Unconditional Guarantee

At Steviva™ we are dedicated to giving you full confidence in our products. In fact, we're so sure that our Fructevia Stevia Sweetener will meet or beat your expectations, we'll take back any unused product and refund your money... no questions asked.
